Technologies

- MySQL / PostgreSQL / MSSQL
- Azure Cloud
- Linux and Windows
- VMWare
- Endpoint Security
- Database Administration
- Backup Methods

Soft Skills

Time Management.

Teamwork & collaboration.

Adaptability & Flexibility.

Problem Solving.

Isuru Anushka

Information Technology

I am a dedicated System Engineer specializing in database management, infrastructure optimization, and cloud solutions. With hands-on experience in system design, endpoint security, database replication, virtualization, and disaster recovery planning, I strive to implement secure, scalable, and high-performing systems. My commitment to continuous learning and problem-solving allows me to drive operational efficiency, ensure system reliability, and support organizational success.

Education

BSc (Hons) in Information Technology.

Sri Lanka Institute of Information Technology

2021 - Present

GCE Ordinary Level / GCE Advanced Level

Mahinda Rajapaksha College Homagama.

2016 / 2017-2019

Experience

Intern - Information Technology

2024 February - Present

Ceylon Biscuits Limited - Pannipitiya

Duties :

- Worked on the Disaster Recovery Plan (DRP) for the organization.
- Helped with database replication and worked with virtual machines (VMs):
- Set up and managed VMs, including creating and deploying them, installing software, and configuring network settings.
- Resolved issues with VMs, ensured they were working properly, and monitored their performance to make sure they had enough resources like CPU, memory, and disk space.
- Helped launch inbuilt applications on servers and set up alerts in Azure.
- Installed and managed CrowdStrike on devices to monitor and protect them.
- Assisted with cloud services, focusing on security and infrastructure.
- System engineering tasks, like setting up and maintaining IT systems, checking their performance, and solving problems.

Projects

- Install & Configure CrowdStrike
- Set Up Database Replication
- Execute PAM Proof of Concept
- Create & Configure Virtual Machines
- Implement Monitoring & Altering in Azure
- Design the Disaster Recovery Plan (DRP) Document
